

Year 2
Science - Animals including Humans

Key Vocabulary	
Offspring	The babies that an animal produces.
Reproduction	Producing offspring.
Growth	When an animal is growing.
Young	An animal's offspring soon after it is born.
Adult	An animal that is fully grown.
Basic Needs	The things an animal needs to stay healthy.
Exercise	Activity to keep an animal's body strong and healthy.
Heartbeat	The pumping of an animal's heart.
Breathing	Taking in air then letting it out again.
Hygiene	Being clean.
Disease	An illness.
Diet	The food that an animal eats.

Key Learning
Animals, including humans have offspring which grow into adults.
In some animals, offspring are babies that grow into adults.
Some animals lay eggs which hatch into young then grow into adults.
The young of some animals do not look like their parents.
All animals, including humans, have the basic needs of feeding, drinking and breathing in order to survive.
Animals, including humans, need food and exercise to grow into healthy adults.
Animals need good hygiene to prevent disease.

Are you a Milecastle Megamind?

The life cycle of a butterfly

How do different animals (mammals, amphibians, reptiles, fish and birds) produce their offspring?

Can you explain how a human should look after themselves so that they stay fit and healthy?

Can you choose an animal and draw its life cycle?
